Writing [Click here to view curriculum knowledge](#)

- Non-Fiction: Instructions
- Fiction: Narrative
- Non-Fiction: Explanation Text

Reading [Click here to view curriculum knowledge](#)

Throughout the term we will have a focus on the novels, 'Kensuke's Kingdom' and 'Secrets of a Sun King'.
Alongside this, we will be also looking at a range of genres including: narratives, non-fiction texts linked to our big question and our history topics, poems, song lyrics and picture books.

We will focus on the following skills:

- Ask questions about a text
- Draw on contextual evidence to make sense of what is read
- Declare and justify personal preferences for writers and types of text
- Justify inferences with evidence
- Make predictions based on details stated and implied.
- Retrieve answers to questions, using information from the text

Maths

Number and Place Value

- read, write, order and compare numbers up to 10 000 000 and determine the value of each digit
- round any whole number to a required degree of accuracy
- use negative numbers in context, and calculate intervals across zero.

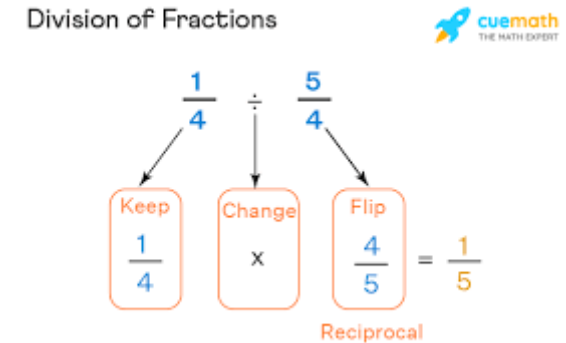

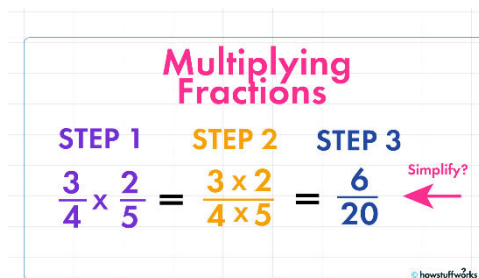

Addition, Subtraction, Multiplication and Division (The four operations)

- multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication
- divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context
- divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context
- perform mental calculations, including with mixed operations and large numbers
- identify common factors, common multiples and prime numbers
- use their knowledge of the order of operations to carry out calculations involving the four operations
- solve single and multi-step problems involving addition, subtraction, multiplication and division, deciding which operations and methods to use and why

- use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.

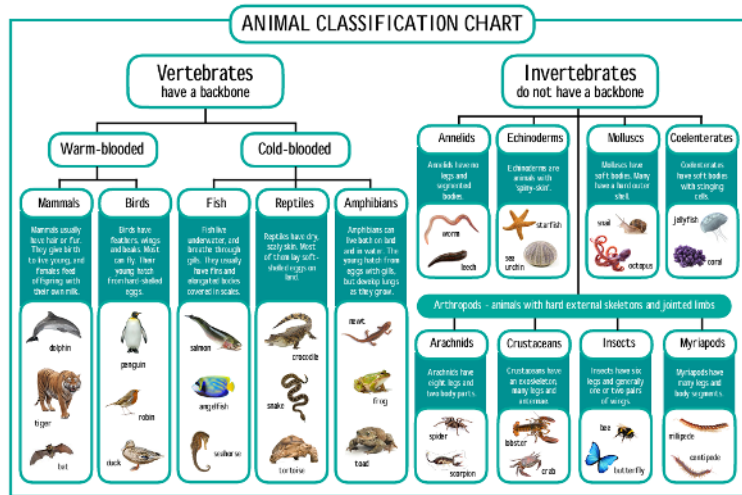

Fractions

- use common factors to simplify fractions; use common multiples to express fractions in the same denomination
- compare and order fractions, including fractions > 1
- add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions
- multiply simple pairs of proper fractions, writing the answer in its simplest form [for example, $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$]
- divide proper fractions by whole numbers [for example, $\frac{1}{3} \div 2 = \frac{1}{6}$]
